PACKLINE SOLUTIONS

Think of us as your partner in packaging!

Packline focuses on delivering an outstanding level of distributor-based customer service, founded on honesty and integrity.

Understanding that our success depends on your confidence and loyalty, We operate only through our distributor network and not directly with end users.

Packline is a progressive company that continues to invest in global sourcing of innovative and quality products, helping you and your customers reduce costs and improve productivity, pack security, workplace safety and care for the environment.

Our distributors draw from our vast range of products available from stock for same-day dispatch and from our long experience in matching packaging challenges with the best solutions.

We have recently added an extensive variety of packaging consumables to our range and the combination of excellent quality and value for money products has contributed to strong growth in sales for our distributors.

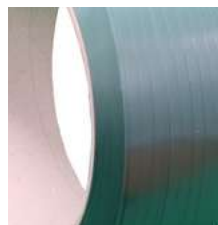

Our philosophy is one of combining quality, proven products with unparalleled service to provide our distributors with the most cost-effective supply solution.

Packline's New 'Easy' Freight Policy

SEALS

Snap-On Seals

- ✓ Dura-Grip Snap-On Seals are used to join Steel Strapping. They are used with a Tensioner and Sealer on flat packages. Strapping seal is placed over the overlapping strap ends either during or after tensioning the metal strapping;
- ✓ Eliminates pre-threading of the seal and speeds the strapping operation;
- ✓ This is the most popular seal for Steel Strapping and is used in most strapping applications;
- ✓ Tools required are a strapping tensioner and strapping sealer.

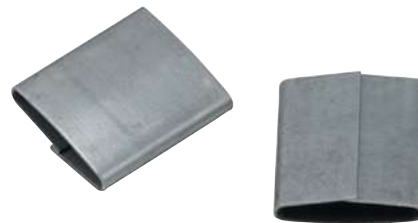

Product Code	Strapping Type	Width	Seal Type	QTY/Box

Short Pusher Seals

- ✓ Dura-Grip Pusher Seals are used where the Steel Strapping is tensioned by butting the nose of the tensioner against the seal;
- ✓ They must be threaded before the tension tool is applied, and can take stronger tension;
- ✓ Overlapping flanges withstand the higher stress;
- ✓ They are a popular seal for round packages and heavy duty applications.

Plastic Edge Protectors

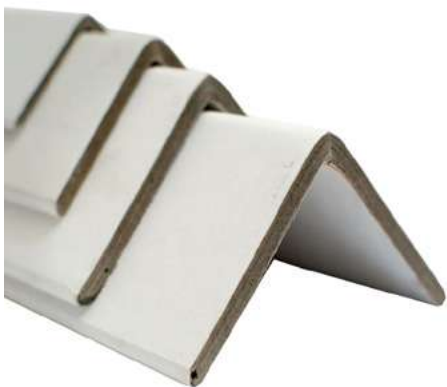

Plastic Edge Protectors

- ✓ Dura-Grip Plastic Edge Protectors are designed to prevent strapping from cutting into cartons and damaging contents, particularly where 'voids' occur.
- ✓ They are also often used on packs of timber to prevent damage by the Strapping.
- ✓ Plastic Corner Protectors have ridges to hold up to 22mm strapping in place - helps secure goods during transit.
- ✓ Made with 100% Recycled Plastic.

If you are looking for a more environmentally friendly carton sealing solution that reduces the risk of pilferage during storage and transit

Gummed Paper Tape is the natural answer

✓ **A Superior Seal**

The water activated adhesives in Gummed paper Tape penetrate into the fibres of the carton, creating a total bond.

✓ **Tamper Evidence**

Gummed Paper Tape cannot be removed from the carton without leaving traces of damage unlike standard packaging tapes which can be removed without a visible trace. Hence Gummed paper Tape offers clearly visible proof if a package seal has been tampered with.

✓ **100% Recyclability**

Gummed paper Tape is made from renewable natural resources which makes recycling easier. Packaging research associations have all accredited Gummed Paper Tape recyclable, making the environmentally friendly choice for the packaging professional.

✓ **Temperature Tolerant**

Even in extreme temperature variations, the characteristics of Gummed Paper Tape remain constant. In extreme heat, humidity and cold, the seal retains its strength whilst the seal also remains highly resistant to aging as well making it the ideal seal solution for long term storage.
