

Steel Strapping

- ✓ Rounded edges making it safer to use
- ✓ High break strength at a thinner gauge = savings on material and shipping
- ✓ Highest break strength – can hold the heaviest loads in place without breaking
- ✓ The most durable strap on the market
- ✓ Made from Bluescope Steel

- ✓ Steel Strap Is Best Used For :

Transporting large, heavy, stable loads

Loads that have sharp edges that could cut softer restraints

Loads being shipped far distances

Loads that will experience multiple loading/unloading operations

Loads that aren't sensitive to damage from contact with steel
