

OrbitWrap

High Performance STRETCH WRAP

Orbitwrap Save

Revolutionise your pallet wrapping with our truly unique blown octene based pre-stretch wrap in that it can be used on all standard friction-brake wrapping machines.

Orbitwrap Save offers a more efficient and cost effective alternative to conventional wrap.

With outstanding puncture resistance and elastic memory, our ultra thin film is a high performance product that will save over 50% of film used per pallet!

Reduce
Up to 50% less film used per pallet

Compatibility
Use with all standard friction brake wrappers

Save
Same performance as higher gauge wrap

High Performance STRETCH WRAP

Orbitwrap Save

FEATURES

- High-performance pallet wrap that uses state-of-the-art resin technology to deliver improved performance and reliability.
- High remaining elasticity in this film allows it to be stretched much further than most of its kind, making it easy to apply by hand or machine.
- Double the amount on a roll compared to conventional hand or machine films.
- Uses over 50% less film per pallet wrapped and reduces environmental impact.
- Film does not neck down when stretched so your pallets are wrapped faster.
- Great puncture strength means sharp edges won't ruin your wrap.
- Double thickness reinforced edges makes them less sensitive to damage and edge tearing

BENEFITS

- A more efficient and cost-effective alternative to conventional wrap.
- Offers the same performance as higher gauge films at a significantly lower cost
- Extremely good combination of holding force and flexibility
