

Dura-Grip

HOT MELT Baling Strap

Bonded strapping has many advantages over conventional manually applied products such as steel straps, metal banding, rope, plastic straps and stretch film. Compared to these products bonded strapping is applied in a faster, safer and more cost effective way.

Ideal for use in Agriculture, Abattoir & Bale press industries.

Gentle on Delicate edges
or surfaces

Weatherproof & UV
resistant

Superior system strength

Dynamic load movement
absorption

HOT MELT Baling Strap

Dura-Grip Bonded

ADVANTAGES

- Gentle on delicate edges and surfaces
- Can be used with buckles or just a knot for easy binding
- Hot melt lamination provides for controlled uncoiling
- Dynamic load movement is absorbed by the elasticity of the strapping
- Weatherproof and UV resistant
- Superior system strength when used with phosphate buckles
