

WOVEN STRAPPING

Dura-Grip

DURA-GRIP woven polyester strapping equals the breaking strain of steel strapping but is only 15% of the weight for similar specifications. It is unaffected by extremes to temperature, humidity or chemical substances and easy to handle, with no sharp edges to injure operatives or product. Woven polyester strapping is stronger than any alternative because it has more filaments that are woven together for extra strength and it has an added stiffening agent in the strap to make it rigid enough for any industrial uses.

Cost efficient

Cannot rust or rot

As strong as steel

WOVEN STRAPPING

Advanced Performance

- Woven Polyester absorbs high impacts far better than steel, thus retaining the load more
- Woven Polyester strapping provides 3-4 % of retraction at normal work tension, which allows the material to stretch. This is not possible with steel.
- Buckle system allows for further retensioning of packs that settle without replacing the strapping. This is a massive advantage over steel strapping.

Handling

- Composite strap coils weigh only 8kg and are easily loaded into the dispenser.
- Each coil contains many more metres compared to a coil of steel strap, reducing the frequency of coil changes.

Simple to Use

- With one tool to tension and cut your strapping, the DURA-GRIP woven strapping system is an effortless and efficient way to secure goods.
- Your customers will benefit too from this strong, safe strapping method which is easily removed and disposed of.

Safety & Disposal

- A major advantage of woven strap over steel is that it has no sharp edges and won't cut hands, face or eyes.
- When cut, it does not spring back as violently as steel.
- Disposal of woven strap is safer easier than steel.

Weather, Chemical & UV Resistant

- Woven strap is virtually unaffected by weather and environment.
- Woven strap does not rust and is resistant to ultraviolet rays and chemicals.
- It also performs very well in temperatures from -40 – 70 degrees C.

- Our polyester woven strapping products are available in a wide variety of widths and strengths
- To get started with Dura-Grip woven strapping you will need to purchase the strapping, buckles, a tensioning tool and a strapping dispenser. Our DURA-GRIP Kits are ideal for new users because they include everything you require, and will save you money.

Code	Description	Length (metres)	Breaking Strain (kgs)
WPS-16S	16mm S/DUTY Woven Polyester - 1 Blue Line	1000	350
WPS-19L	19mm L/DUTY Woven Polyester - 1 Blue Line	850	590
WPS-19S	19mm S/DUTY Woven Polyester - 1 Red Line	700	840
WPS-19H	19mm H/DUTY Woven Polyester - 2 Red Lines	500	1100
WPS-32H	32mm S/DUTY Woven Polyester - White	125	2300
