

Pacmasta®

Pacmasta®

Vertical Double Impulse Auto Sealer Range

Pacmasta FDV automatic sealer is designed for vertical heavy-duty sealing. It can be collocated with a conveyor or working table, to be linked to dosing and filling systems. Double sides sealing is suited for heavy-duty bags and wet or dusty bags. Vertical seals preventing loose products like powders and liquids from spilling when sealing.

Features

- Excellent for plastic bags
- Temperature adjustable
- Heavy-duty working table for big bags

Product code	Max seal length	Seal width	Watts	Max material thickness
