POLYPROPYLENE STRAPPING

Benefits of DURA-GRIP Polypropylene Strapping

Advanced Performance

- Polypropylene offers the greatest elongation of all strapping and has good initial recovery characteristics. Our polypropylene can be heat sealed with a joint efficiency of 70–80%.
- By nature, polypropylene strapping is very flexible and simplifies the job of strapping by its ability to mould to contours of odd-shaped or irregular-shaped packages.

Cost Effective

- The most economical of all strapping materials, polypropylene is one of the lightest weight straps.
- It is available in many different widths and thicknesses.

Fully Auto Grade

- A fully auto strap that works!
- Greatly reduce misfeeds and dust buildup commonly caused by poor quality strapping.
- A good-quality strap will reduce downtime and machine maintenance costs.
- Our strapping is designed to work in all brands of machinery to ensure trouble-free operation.

Simple to Use

- With one tool to tension and cut your strapping, the DURA-GRIP PP strapping system is an effortless and efficient way to secure goods.
- Your customers will benefit too from this strong, safe strapping method, which is easily removed and disposed of.

Safety & Disposal

- A major advantage of PP strap over steel is that it has no sharp edges and won't cut hands, face or eyes.
- When cut, it does not spring back as violently as steel.
- Disposal of PP strapping is easy and safe.
